

Cooling System Flush

Fortron Cooling System Flush is a specially formulated flush and cleaning agent to deliver the optimum cooling system cleaning to provide enhanced efficiency for all types of engine radiators.

Deposits of sludge, scale and grease in the heating / cooling system slow down the rate of heat transfer and therefore the efficiency of the cooling system.

CORRODED

PROTECTED

Fortron Cooling System Flush ensures optimum engine cooling and enhances reliability of total system.

This product will remove rust, sludge and scale deposits and restore system to its original performance characteristics.

SUMMARY OF BENEFITS

- Helps clean the entire cooling and heating system
- Helps ensure optimum engine cooling and reliability
- Is compatible with all types of material within the cooling system
- Non-acidic, solvent less and biodegradable
- Will not adversely affect radiator seals or radiator hoses
- Non-hazardous, non-flammable, non-toxic and non-corrosive
