

# 50/50 Glycol Premix Coolant

50/50 Glycol Premix Coolant is a phosphate-free and amine-free, fully formulated, low silicate hybrid technology coolant.

Engineered to meet the performance requirements of passenger cars, 4WDs and light duty diesel commercial vehicles.

This coolant provides protection to all metals found in cooling systems. It is also compatible with the non-metallic materials found in cooling systems, including rubber hoses, gaskets, silicon elastomer seals and plastics.

## SUMMARY OF BENEFITS

- Anti Boil, Anti Freeze, powerful protection
- Gives 3 years or 100,000 km in an automotive, 4WD, and light duty diesel application.
- Universal use – meets or exceeds standard industry requirements for automotive and 4WD applications.
- Universal Compatibility – product is compatible with other engine coolants; although to get best performance it is best to flush the old coolant and replace with 50/50% Glycol Premix Coolant.
- Premix 50% ready to use. This product has been diluted to 50% with demineralised water for a complete fill. It must not be diluted.
