

Battery Terminal Protector

Fortron Battery Terminal Protector has been specifically formulated to provide long lasting protection for battery terminals.

SUMMARY OF BENEFITS

The choice of ingredients in the new Fortron Battery Terminal Protector ensures effective, safe and long lasting protection. This product when used as directed will inhibit corrosion, neutralise harmful acids and inhibit the growth of the common “white acid” found on terminal posts.

Fortron Battery Terminal Protector can be used on all types of batteries and when dries to a firm non-dust attracting film.
