

Chain Lube

Fortron Chain Lube is an aerosol product specially formulated for all chain drive applications.

SUMMARY OF BENEFITS

Fortron Chain Lube may be used for a wide range of general purpose applications. The high penetrative ability ensures positive lubrication of internal and external chain components.

Evaporation of the carrier solvent deposits a tough, tenacious high temperature lubricant fortified with chemical and molybdenum di-sulphide additives which plate out and cling to all moving parts giving superb protection. Fortron Chain Lube will also effectively protect equipment from corrosion.

Chain Lube is very useful for the following areas:

- Motorcycles
- Automotive
- Farming
- Mining
- Industrial
- Marine
