

# Gasket Stripper

**Fortron Gasket Stripper is specially formulated to actively soften all gasket and jointing compounds.**

## SUMMARY OF BENEFITS

Fortron Gasket Stripper is a highly formulated surface active agent to be used in the process of softening gaskets and all jointing compounds.

When applying to hard surfaces ensure that they are mechanically scraped/abraded and cool. Spray Gasket Stripper onto surface only until wet and allow time for penetration. Deposits should then be easily scraped or wiped off with a rag. Always use care around painted areas.

Suitable to remove all kinds of gaskets
