

Eco-Safesolve

Biodegradable Solvent Degreaser

Fortron Eco-Safesolve is a solvent based, user friendly and biodegradable new age degreaser.

Its non phosphate petroleum hydrocarbon free and quick break formulation, makes it an ideal multi purpose degreaser.

Usage – Degreasing plant and equipment, manual cleaning of parts through a parts washer, hand cleaners, floor cleaner, and flushing of radiators to remove oil deposits prior to reconditioning.

Eco-Safesolve may be diluted 4:1, apply through a clean safe dispensing system or simply through a spray bottle. Allow a few minutes for contact and then remove using high pressure water.

SUMMARY OF BENEFITS

- Biodegradable – eliminating environmental damage associated with some degreasers particularly those based on petroleum hydrocarbons.
- A neutral pH – user friendly to operators.
- No solvent vapours making it user friendly in confined areas.
- A quick break degreaser which promotes rapid phase separation of emulsions formed in the cleaning operation and efficient operation of oil / water separation.
- Non flammable which eliminates fire risk while cleaning.
- Good grease cutting power, effective on oils, greases, road grime and vehicle exhaust deposits.
- Good rinsability – no slippery surfaces during / after cleaning.
- May be economically dispensed through the various dispensing systems or simply sprayed on with a spray or air spray bottle.
- Useful in parts washers for manual cleaning of small components.
- Contains a corrosion inhibitor to reduce corrosion of unprotected metal components.
