

Anti-Freeze / Anti-Boil Coolant

Fortron Anti-freeze/ Boil Coolant is a specially formulated Universal Coolant that provides superior protection against engine cooling system corrosion, particularly with those containing aluminium alloys.

SUMMARY OF BENEFITS

Fortron Anti-freeze/ Boil Coolant not only meets the Australian Standards but also a wide range of International Standards and Original Equipment Manufacturers Performance specifications. (See specification sheet for more details).

Suitable for use in a wide range of applications including vehicles, trucks, heavy plant, marine, 4WD's and light duty diesel applications. Fortron Anti-freeze/ Boil Coolant provides excellent aluminium alloy corrosion protection and has proven heat transfer properties in high temperatures and anti-foam characteristics.

In its pure unused form it is 100% biodegradable and also compatible and safe for all water pump seal materials.
