

CFI Coolant

Fortron CFI (Complete Fill Inhibitor) Coolant is an advanced pre-mix formulation cooling system treatment that provides maximum cooling system protection and efficiency on all types of vehicles.

SUMMARY OF BENEFITS

- Pre-mixed Complete Fill Inhibitor Coolant – simply serve directly to cooling system.
- Protects all metal surfaces from rust, corrosion, cavitation, erosion and scale.
- Helps maintain original design heat transfer and engine performance.
- Inhibits electrolysis and reduces foaming.
- Conforms to the following specification standards:
AS2108-2004 Type B
ASTM D 1384
ASTM D 4340
ASTM D 2570
- Compatible with most modern MEG anti-freeze/boil coolants. To avoid possible incompatibility problems, always avoid mixing with other coolants where possible.
- Non hazardous, non toxic, non flammable.
