

Cooling System Stop Leak

Fortron Cooling System Stop Leak helps stop leaks in the cooling system with a minimum of effort. Leaks and hairline cracks in the car's cooling system leads to loss of water and reduces the performance of the cooling and heating system. If these problems are not treated immediately, costly repairs could be incurred.

Fortron Cooling System Stop Leak contains organic suspension fibres, which help to stop leaks in the cooling system. When used as directed the correct function of the cooling system is restored. Fortron Cooling System Stop Leak provides a quick solution by effectively stopping leaks and hairline cracks in emergency situations.

SUMMARY OF BENEFITS

- Helps effectively stop leaks in cooling system
- Helps prevent seepage from high compression cylinder heads
- Helps lubricate water pump
- Helps seal hairline cracks in engine block
- Helps prevent costly repairs in emergency situation
