

# Manual Gearbox Treatment

Fortron Manual Gearbox Treatment is scientifically blended to extend the life of bearings, gears and seals.

Fortron Manual Gearbox Treatment will help extend the life of bearings, gears and seals and will also protect against shock loading, wear, gumming, rust and corrosion.

This product is technically compatible with all conventional mineral oil products marketed by the major suppliers of lubricants.

## SUMMARY OF BENEFITS

- Helps extend life of bearings, gears and seals.
- Helps protect against shock loading
- Helps protect against rust and corrosion
- Helps protect against wear and gumming
- Helps promote cooler gear operation
- Helps reduce gear noise
- Helps reduce friction and drag
