

Strong Motor Oil

Fortron Strong Motor Oil is formulated to prevent wear and keep engines clean, maintaining high oil pressure and low oil consumption in newer and older engines operating under all types of motoring conditions.

Fortron Strong is a superior quality, high viscosity, index multi-grade engine oil, which meets the requirements of A.P.I, S.A.E., European, and Japanese manufacturers' specifications for petrol and light turbo-charged diesel engine.

SUMMARY OF BENEFITS

The choice of base oils used in Fortron Strong has resulted in an oil of very low volatility in piston ring and valve areas, which effectively aims at controlling oil consumption. The same base combination assists sealing in such areas as valve guides, combustion chambers and gasket/seals.

Modern engines demand fully 'inhibited' qualities to control sludge, gums, varnish, wear and bearing corrosion. Fortron Strong addresses these problem areas using the latest petrochemical technology available.

- Helps limit oil consumption
- Helps resist wear and corrosion
- Helps maintain oil pressure
- Helps control sludge, gums and varnishes
