

# Automatic Transmission Flush Service

Fortron Automatic Transmission Service, utilizing the Fully Automatic Transmission Flush Machine, is designed to allow quick and easy exchange of Automatic Transmission Fluid, while providing a fully balanced treatment package to extend the life of the automatic transmission.

## FEATURES

- 100% of ATF replaced during service operation.
- Fast and efficient way of completely exchanging transmission fluid—15-20 minutes per Service.
- Fully automatic, user friendly, safe and reliable operation.
- Safe and compatible service kit includes Flush and Conditioning Treatment.
- Great 'value add' service opportunity for Workshop Service Centres.

## DID YOU KNOW

Almost 90% of transmission fluid failures are due to dirty and overheated Automatic Transmission Fluid according to the ATRA – Automatic Transmission Rebuilders Association. Regular and complete Automatic Transmission Fluid exchange will ensure fluid remains clean and may prevent expensive premature failure.

## AFTER SERVICE BENEFITS

- Smoother and quieter operation.
- Safely removes varnish, sludge and oxidized fluids.
- Optimise transmission efficiency.
- Prolong transmission life.
